

## COMPLIANCE COMPONENT

Last Update: 8/3/05

DEFINITION							
<i>Name</i>	Gender Code Table						
<i>Description</i>	This document contains the basis for the creation of a gender code table standard for the classification of people based upon the sex of an individual.						
<i>Rationale</i>	Provides a set of guidelines In which gender data code table elements can be uniformly defined, coded and maintained thereby allowing integration and interaction between state systems within Missouri. Gender classification has become increasingly complicated over time with the introduction of certain medical procedures, which alter the physical sexual characteristics of an individual. This makes a more diverse, yet uniform set of classifications necessary.						
<i>Benefits</i>	Provides a standard for classifying and coding gender data within the state of Missouri. Eliminates numerous variations each state agency may use when defining gender data.

COMPLIANCE DETAIL							
<i>State the Guideline, Standard or Legislation</i>	<p>The most common internationally recognized standard for gender is ISO 5218. It is limited to values corresponding to Male (1), Female (2), Not Known (0) and Not Specified (9). State agencies shall use the following values for gender descriptions and codes which is a slight modification wherein a true null value for gender is to be explained in a separate column rather than within the GenderCode field itself and be defined utilizing the codes (NullCode) outlined in the <b>Compliance Component Data Element Definition Standard</b> to add characterizations for the data when it is defined as null..</p> <table> <tr> <th><u>GenderCode</u></th><th><u>GenderDescriptionText</u></th></tr> <tr> <td>1</td><td>Male</td></tr> <tr> <td>2</td><td>Female</td></tr> </table> <p>For the related element definition standard see <b>Compliance Component Gender Element Standard</b></p> <p>The ISO 5218 standard explicitly states that no significance is to be placed on</p>	<u>GenderCode</u>	<u>GenderDescriptionText</u>	1	Male	2	Female
<u>GenderCode</u>	<u>GenderDescriptionText</u>						
1	Male						
2	Female						

	<p>the fact that <i>male</i> is encoded as 1 and <i>female</i> as 2. The encoding merely reflects existing practice in the countries that initiated this standard.</p> <p>Possible additions could include, but are not limited to the following:</p> <p>3      Male and Female</p> <p>4      Male from Female</p> <p>5      Female from Male</p>
